UCF LANDSCAPE & NATURAL RESOURCES

ADOPT-A-POND or ROAD

The Adopt-a-Pond/Road program focuses on the care and maintenance of the UCF retention ponds and campus roads. Each identified pond or road should be adopted by individuals who will commit to the project in a dependable manner. The adoptees must maintain both the shoreline and the vicinity of the pond or road; however, entrance into the pond water or road is prohibited.

Landscape & Natural Resources will provide two types of trash bags: clear bags designated for recyclable items and black bags designated for other trash. The bags will then be brought back to the Arboretum Trailer for proper disposal. It is required that adoptees participate once every two weeks. After three months of commitment, a sign will be placed by the pond or road to highlight the individuals' work. The organization is required to email nature@mail.ucf.edu specific dates and times of cleanup at the beginning of the semester, or within one week of signing the contract.

Trash bags and equipment can be found on the patio of the Arboretum Trailer. The Arboretum office is located in TR 525 behind the new engineering building (Harris Engineering Center) and CREOL. On the campus map it is labeled as portable cluster #3 under the "Find a Building" drop down menu: www.campusmap.ucf.edu/flash/index.php

Name of group_____

Name of pond/road_____

Date and time of first cleanup_____

Dates and times of all cleanups_____

Group Representative Information

Name_____

Phone_____
